ColorClear Fentanyl Test Strip

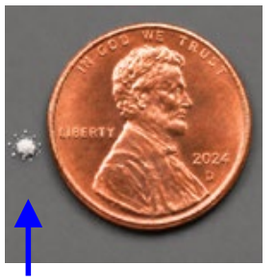

Test procedure

① Fill a cup with about 5 mL water

② Mix the sample thoroughly. If it is a tablet, crush it into a fine powder first. Collect samples from 3 – 5 different locations, using the amount shown above for each location.

③ Place the entire sample in the water and stir until completely dissolved.

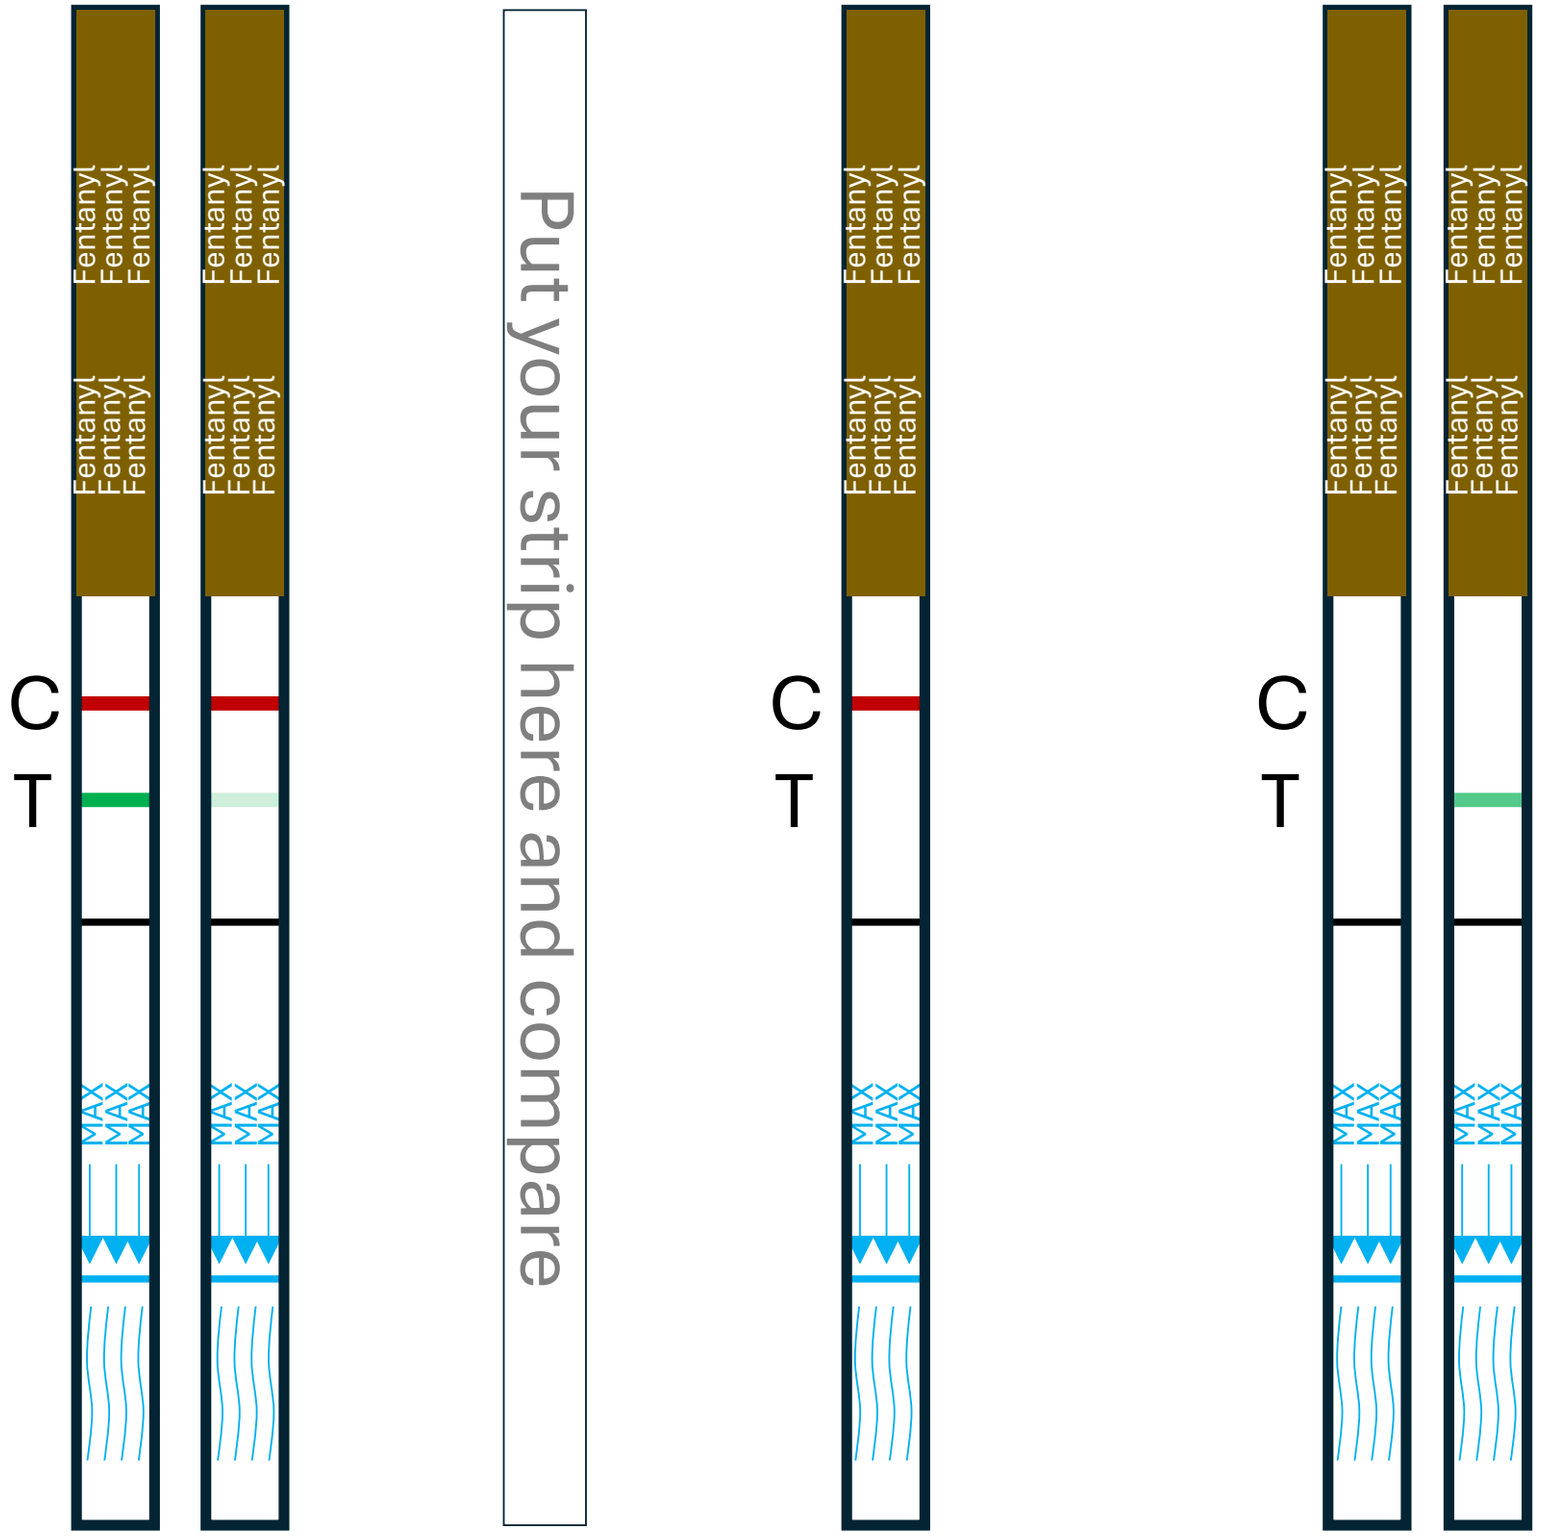

④ Remove the strip from the pouch. Dip it into the water for 15–20 seconds, until the water migrates up.

⑤ Take the strip out and place it on a non-absorbent flat surface, wait for 3 to 5 minutes.

See reverse side for result interpretation
